

ENVIRONMENTAL POLICY

Our Commitment

Harrison How Limited is committed to the protection and enhancement of the environment.

We recognise that our business activities, supply chain and customers all have a major impact on the effects of the environment.

We understand it is always our responsibility to maintain a high environmental performance and help combat the huge risks of climate change.

Reduction of resources is important, and we strive to ensure all electricity is limited to the required amounts within our offices and on sites.

We aim to continue to reduce pollution. We have reduced the delivery of materials to help the impact of vehicles on our streets to improve air pollution. Subsequently we have limited vehicles we have on the streets and over 90% of our workforce attends jobs on public transport.

Waste and Recycling

We are committed to effective waste management and provide waste bins for general, food and recycling. We have designated areas for disposal of waste on our site.

We aim to reduce the waste usage in our business activities wherever possible by reutilising items where possible and prevent wasting resources.

As a mechanical and electrical company, all our goods including lamps and fittings are disposed of in accordance with the WEE regulations.

Training

Our staff are regularly trained in our expected standards and procedures regarding the environment. We are always looking for new ways to improve as a business and pass this onto our staff.

Customers

We encourage our customers to install environmentally friendly and long-lasting materials, as well as educate them where possible to reduce the carbon footprint regarding electricity usage, heating and cooling.
